# SEWAGE PUMPS

DRAINAGE PUMPS  
 VORTEX SEWAGE PUMPS  
 NON-CLOG PUMPS  
 CUTTER PUMPS

GRINDER PUMPS  
 SINGLE CHANNEL PUMPS  
 VORTEX & AGITATOR PUMPS

## COMMON FEATURES

### 1 Watertight Cable Entry

The cable entry employs an anti-wicking block where each conductor is stripped and encapsulated in epoxy. This feature effectively prevents water from penetrating the motor chamber when the cable end is submerged or the cable sheath is damaged.

### 2 Motor Protector

The motor incorporates a motor protection device which protects against overheating and dry-run. Pumps with a capacitor-run or direct-on line starting motor are equipped with a circle thermal protector. Pumps with a start-delta starting motor are equipped with miniature thermal protectors in each phase.

### 3 Submersible Motor

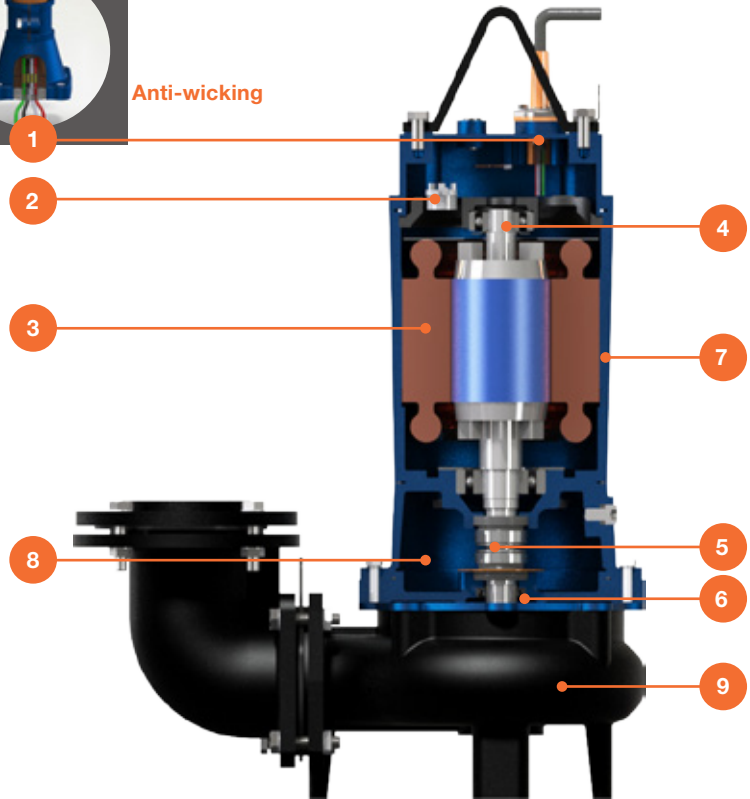

Air filled motor, housed in a watertight casing, conforms to Class F insulation.

### 4 C3 Ball Bearings and Hardened SS Shaft

High quality of C3 ball bearings and the well-balanced, hardened stainless steel shaft enhance stability during continuous pumping operations.

Anti-wicking

### 5 Double Mechanical Seals

Located in the oil chamber, the device is made of quality materials with highly wear-resistant silicon carbide in lower side that provides extra protection against leakage and dry-run.

### 6 Extra Protection for Mechanical Seals and Shaft

Lip seals and shaft sleeves are utilized for additional protection against wear.

### 7 Rugged Cast Iron Design

The whole cast iron pump features a simple, robust structure that provides durability and impact resistance to rough conditions.

### 8 Food Grade Lubricant

FLO FAB adopts eco-friendly lubricant to minimize environmental impacts.

### 9 Impellers and Volutes

Types of impellers and volutes are varied with pump models, cultivated through years of experience in the pump manufacturing industry.

They include single channel impellers, vortex impellers, semi-open impellers, grinders, and agitators.

# LB 25

## HANDY & RESIDUE PUMPS

The LB 25 pump is suitable for a variety of domestic applications, including draining basements and garages, emptying swimming pool and fountains, gardening, and hobby applications in general.

- Compact, lightweight, and easy-to-use design
- Stainless Steel 304 motor housing with lightweight top cover, pump casing, impeller, and suction grids.
- Air filled motor with Class F insulation.
- Thermal protection on motor.
- Built-in high torque capacitor.
- Triple seals design.
- Removable filter screen for easy maintenance.

### FEATURES

#### 1 Watertight Cable Entry

Watertight cable entry prevents water incursion from the capillary wicking.

#### 2 Durable Outer Housing

The outer housing made of 304 stainless steel provides impact resistant to harsh handling and conditions.

#### 3 Motor Protector

The motor incorporates a miniature thermal protector which protects against overheating and dry-run.

#### 4 Submersible Motor

Air filled motor, housed in a watertight casing, conforms to Class F insulation.

#### 5 Stainless Steel 304 Motor Housing

The material provides superior corrosion resistance.

#### 6 C3 Ball Bearings and Hardened SS Shaft

High quality of C3 ball bearings and the well-balanced, hardened stainless steel shaft enhance stability during continuous pumping operations.

#### 7 Mechanical Seal

The premium mechanical seal provides extra protection against leakage and longer life span.

#### 8 Impact-resistant Nylon pump casing and suction grid

Lightweight design and corrosion-resistance.

#### 9 Food Grade Lubricant

FLO FAB adopts eco-friendly lubricant to minimize environmental impacts.

## LB SERIES DRAINAGE PUMPS

**Discharge Bore :** 50 - 80 mm

**Motor :** 0.25 ~ 0.75 kW

**Impeller Type :** Semi-Open impeller

**Features :** Offering high performance in various effluent pumping applications.

## LBV - FBV SERIES VORTEX PUMPS

**Discharge Bore :** 50 - 100 mm

**Motor :** 0.4 ~ 7.5 kW

**Impeller Type :** Vortex impeller

**Features :** A whirling action enables large solids and fibrous matters to be pumped out without obstruction.

## LBK - FBK SERIES NON-CLOG PUMPS

**Discharge Bore :** 50 - 100 mm

**Motor :** 0.4 ~ 2.2 kW

**Impeller Type :** Semi-Open Channel impeller

**Features :** Wide channel allows solids passing with minimal blockage.

## LBC - FBC SERIES CUTTER PUMPS

**Discharge Bore :** 50 - 100 mm

**Motor :** 0.4 ~ 2.2 kW

**Impeller Type :** Semi-Open Channel Cutter impeller

**Features :** Utilizing a cutter mechanism and tungsten carbide alloy to cut fibrous matters and to prevent clogging.

## FGC SERIES GRINDER PUMPS

**Discharge Bore :** 32 - 50 mm

**Motor :** 0.75 ~5.5 kW,

**Impeller Type :** Vortex impeller

**Features :** Employing a grinding mechanism to prevent clogging, especially ideal for narrow sewer.

## FNC SERIES SINGLE CHANNEL PUMPS

**Discharge Bore :** 80 - 150 mm

**Motor :** 3.7 ~ 22 kW

**Impeller Type :** Single Channel impeller

**Features :** Passing 76mm diameter solids without clogging.

## TBV SERIES VORTEX & AGITATOR PUMPS

**Discharge Bore :** 80 mm

**Motor :** 1.5~ 2.2 kW

**Impeller Type :** Vortex impeller

**Features :** Coupled with an agitator, which significantly and efficiently improves solids handling.

## GUIDE RAIL FITTING SYSTEMS

The guide rail fitting system connects the pump to and from the piping simply just by lowering and elevating the pump.

The mechanism allows easy maintenance and inspection without the need to enter the sump. Pump models used in combination with the guide rail fitting system can be identified by the following index and reference.

Available upon request.

# STAINLESS STEEL PUMPS

## DEWATERING & SEWAGE VORTEX

FLOFAB stainless steel pumps consist of four dewatering pumps (FSS-400-750-215 -315) and two sewage pumps LBVSS75-215). All components in contact with the liquid are made of 304 stainless steel.

These pumps are designed for handling clean water or screened wastewater, also applicable to the aquaculture industry with the use of the food-grade lubricant.

### FEATURES

#### 1 Watertight Cable Entry

The cable entry employs an anti-wicking block where each conductor is stripped and encapsulated in epoxy. This feature effectively prevents water from penetrating the motor chamber when the cable end is submerged or the cable sheath is damaged.

#### 2 Top Discharge and Double Housing Design

Designed to construct a water jacket that provides maximum motor cooling effect for continuous operation at low water level, this feature forms the cylindrical and slim shape of the pump and enables the pump to be installed in confined spaces.

#### 3 Motor Protector

The motor incorporates a circle thermal protector which protects against overheating and dry-run.

#### 4 Submersible Motor

Air filled motor, housed in a watertight casing, conforms to Class F insulation.

#### 5 C3 Ball Bearings and Hardened SS Shaft

High quality of C3 ball bearings and the well-balanced, hardened stainless steel shaft enhance stability during continuous pumping operations.

#### 6 Double Mechanical Seals

Located in the oil chamber, the device is made of quality materials with highly wear-resistant silicon carbide in lower side that provides extra protection against leakage and dry-run.

#### 7 Extra Protection for Mechanical Seals and Shaft

Lip seals and shaft sleeves are utilized for additional protection against wear.

#### 8 Food Grade Lubricant

FLO FAB adopts eco-friendly lubricant to minimize environmental impacts.

# FS SERIES

## HANDY & RESIDUE PUMPS

Compact, lightweight and easy to use, the FS handy & residue series pumps (FS-400-750-1500) deliver high performance for their size. These small but effective dewatering pumps are easily maintained and perfect for a variety of applications, such as small construction sites, rental industries, and municipal jobs.

### FEATURES

- 1 Watertight Cable Entry**  
The cable entry employs an anti-wicking block where each conductor is stripped and encapsulated in epoxy. This feature effectively prevents water from penetrating the motor chamber when the cable end is submerged or the cable sheath is damaged.
- 2 Top Discharge and Double Housing Design**  
Designed to construct a water jacket that provides maximum motor cooling effect for continuous operation at low water level, this feature forms the cylindrical and slim shape of the pump and enables the pump to be installed in confined spaces.
- 3 Motor Protector**  
The motor incorporates a circle thermal protector which protects against overheating and dry-run.
- 4 Submersible Motor**  
Air filled motor, housed in a watertight casing, conforms to Class F insulation.
- 5 C3 Ball Bearings and Hardened SS Shaft**  
High quality of C3 ball bearings and the well-balanced, hardened stainless steel shaft enhance stability during continuous pumping operations.
- 6 Double Mechanical Seals**  
Located in the oil chamber, the device is made of quality materials with highly wear-resistant silicon carbide in lower side that provides extra protection against leakage and dry-run.
- 7 Extra Protection for Mechanical Seals and Shaft**  
Lip seals and shaft sleeves are utilized for additional protection against wear.
- 8 Durable Outer Jacket and Strainer**  
The outer housing and strainer made of 304 stainless steel provide impact resistant to harsh handling and conditions.
- 9 Food Grade Lubricant**  
FLO FAB adopts eco-friendly lubricant to minimize environmental impacts.

# FS SERIES

## HIGH CHROME DEWATERING PUMP

Designed for continuous operations, excellent performance and easy maintenance, FLO FAB FS series pumps have proven their reliability and durability in demanding areas like construction, mining, tunneling, quarries, industries and rental applications.

### FEATURES

- 1 Watertight Cable Entry**  
The cable entry employs an anti-wicking block where each conductor is stripped and encapsulated in epoxy. This feature effectively prevents water from penetrating the motor chamber when the cable end is submerged or the cable sheath is damaged.
- 2 Multi-Direction Discharge Coupling**  
Discharge can be converted between vertical and horizontal directions. In pumps 7.5 HP and larger, a vertical discharge connection is supplied as standard.
- 3 Motor Protector**  
The motor incorporates a circle thermal protector which protects against overheating and dry-run.  
**Top Discharge and Double Housing Design**  
Designed to construct a water jacket that provides maximum motor cooling effect for continuous operation at low water level, this feature forms the cylindrical and slim shape of the pump and enables the pump to be installed in confined spaces.
- 5 Submersible Motor**  
Air filled motor, housed in a watertight casing, conforms to Class F insulation.
- 6 C3 Ball Bearings and Hardened SS Shaft**  
High quality of C3 ball bearings and the well-balanced, hardened stainless steel shaft enhance stability during continuous pumping operations.

The above images are for illustration purposes only, please refer to datasheets for more details.

- 7 Double Mechanical Seals**  
Located in the oil chamber, the device is made of quality materials with highly wear-resistant silicon carbide in lower side that provides extra protection against leakage and dry-run.
- 8 Extra Protection for Mechanical Seals and Shaft**  
Lip seals and shaft sleeves are utilized for additional protection against wear.
- 9 High Chrome Iron Impeller**  
FLO FAB patent formula, ACRS Tech is applied to all high chrome iron impellers. This technology increases wear resistance to particle abrasion.
- 10 Durable Outer Jacket and Strainer**  
Corrugated Outer Jacket and strainer made from 304 stainless steel provide impact resistance to harsh handling and conditions. In pumps 7.5 HP and larger, flat 304 stainless steel outer casing is provided as standard.
- 11 Food Grade Lubricant**  
FLO FAB adopts eco-friendly lubricant to minimize environmental impacts.

720143 (GGIDW8000)	80	16/3	NO/NC
720141 (GGIDW9900)	100	16/3	NO/NC

### Operating Characteristics

Switch operates with float level. Differential angle between ON and OFF is approximately 25° for either NORMALLY OPEN (NO) or NORMALLY CLOSED (NC) and 90° for double throw mechanical floats (NO/NC).

**Installation:** Either pipe mounted or suspended. For suspended application order cable weight #720149.

**Electric Rating:** 10A-115/230V AC

**Float:** High Impact Polystyrene

**Cable:** 16/2 "SJOW" NO or NC - 16/3 "SJOW" NO/NC

**Temperature:** 140°F (60°C)

- Never work in the sump with the pump ON
- Attach the level control to the mounting pipe or the pump discharge pipe.
- For suspended installations see fig.2 and fig.4
- Arrange the level controls so they do not tangle or hang up

**NOTE:** All liquid level controls are pilot duty devices which control the function of motor load devices, such as contactors, motor starters, and power relays, to automatically cycle a pump(s). They can also be used for alarm signaling devices. They cannot be used to directly power pump motors. Also do not use floats in gasoline or other combustible. Sway rings are recommended to be used in lift station where direct turbulence from incoming sewage may snarl or tangle the float cables. See fig.3

## Mercury Bulb Control

### Features

-Three models available: PC (Pipe Clamp)  
SWI (Internal Weight)  
SWE (External Weight)

- Single pole, heavy duty mercury tilt switch is epoxy encapsulated in non-corrosive, plastic float
- Entire unit (control as well as cord set) UL listed and CSA approved
- Two year limited warranty

### Application

Sensor floats may be used to activate pump control panels, solenoids, and relays. This liquid level control is frequently used in sewage systems, irrigation systems, and in other water systems.

### Description

All sensor float models are rated 13 amps (120V AC). Both the heavy duty, mercury activated tilt switch and the cord conductors are epoxy sealed in a watertight, impact resistant float housing. The mercury tilt switch activates when the float is a few degrees above or below the horizontal position.

### Specification

Models: NORMALLY OPEN 10PCNO, 10SWINO, 10SWENO  
NORMALLY CLOSED 10PCNC, 10SWINC, 10SWENC

**NOTE:**Numbers preceding model designation (PC, SWI, SWE) refer to cable length. the sensor float control switch is available in standard length of 10, 15, 20, 30, 40 and 50 ft. Other length available on request.

**Cable:** Water-resistant, Neoprene, Flex. 16 gauge, 2 conductors "SJOW" UL and CSA approved.

**Electrical Rating:** 13 amp 120/230V AC

**Float:** 3.18" dia. x 3.875" long, high impact resistant, noncorrosive PVC for use in liquids up to 140°F (60°C)

**External weight:** 2lbs of cast iron

**Mercury Tilt Switch:** Mercury to Mercury contacts

## Mercury Bulb Control

**NORMALLY OPEN (pump down):** The mercury float switch closes (Turns ON) when the float tips a few degrees above the horizontal position and opens (Turns OFF) when the float drops a few degrees under the horizontal position.

**NORMALLY CLOSED (pump up):** The mercury float switch closes (Turns ON) when the float drops a few degrees under the horizontal position and opens (Turns OFF) when the float tips a few degrees over the horizontal position.

- 1) Determine activation level
- 2) Strap sensor float control switch to discharge pipe or similar mounting at determined activation level. See illustration. The activation level may be adjusted by moving the pipe clamp up or down on the discharge pipe.
- 3) Wire sensor float cable directly into

### PC : Pipe Clamp

- 1) Determine activation level
- 2) Suspend the internal weight sensor control switch 7" below the determined activation level. See illustration
- 3) Wire sensor float cable directly into control panel

### SWI : Internal Weight

- 1) Determine activation level
- 2) Suspend the external weight sensor control switch 4" below the determined activation level. See illustration.
- 3) Wire sensor float cable directly into control panel

### SWE : External Weight

## Polythylene Basin

2436PB	24	24	36	28
3036PB	30	30	36	34
3036PB	36	36	36	40

FLO FAB polythylene basins are designed to receive submersible sumps, effluent and sewage pumps up to 2 Hp for simplex and up to 1 Hp for duplex systems. Each tank is manufactured using roto-molding process. Each tank features extra heavy corners, will not crack, chip, rot, rust or corrode. Due to the light weight, no special handling equipment is required.

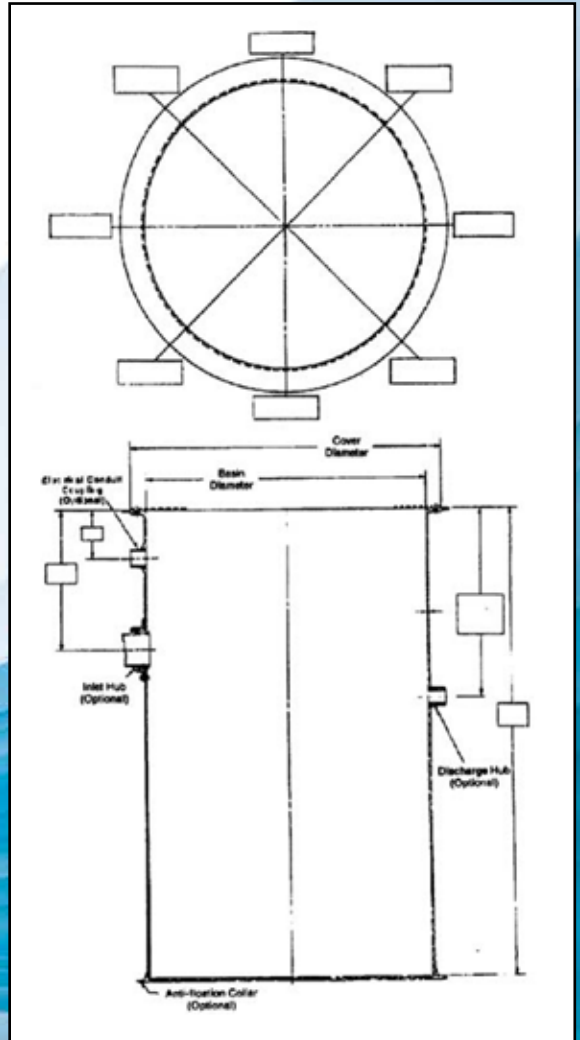

### Typical Installation

## Fiberglass Basin

Fiberglass basins are available in 18" to 72" diameters, in 6" increments. Depth are available in 30" to 120", also in 6" increments.

Construction is custom molded fiberglass reinforced polyester resin. The inside surface is gel coated from 1/2" to 1" thick to provide a smooth sealed surface. The wall thickness will withstand a water saturated sand load of 120 lbs per cubic foot with a safety factor of 2 at all depths. Inlet hubs, discharge hubs, discharge couplings are optional for field installation. If factory installation is required, identify location in both planes.

## Fiberglass Basin Parts

### Discharge and Conduit Couplings

Couplings are fastened to the wall of the basin and are used to discharge the piping and to run conduit pipe to the control panel.

Models Modèles	Dia in (po)	Material Matériaux
400-A730028	1 1/4 NPT	PVC (CPV)
400-A730029	1 1/2 NPT	PVC (CPV)
400-A730030	2 NPT	PVC (CPV)
400-A730031	2 NPT	Stainless Steel/Acier Inox.

### Inlet Hubs

Inlets include gasket and 4 fasteners for mounting on the wall of the basin.

Models Modèles	Dia in (po)	Material Matériaux
400-A730025	4	Cast Iron (Fonte)
400-A730026	6	Cast Iron (Fonte)
400-A730037	8	Cast Iron (Fonte)

### Adapt-A-Flex Fitting

Adapt-A-Flex fittings are available for 2", 3", 4", 5" and 6" plastic pipes. They are easy to install. No tooling or sealants required. Corrosion resistant.

Models Modèles	Dimension in (po)	Hole (in) Trou (po)
400-A730067	2	3
400-A730068	3	4
400-A730069	4	5
400-A730070	6	7

## Iron Hubs

### Installation

Installation may be done at the factory or at the construction site.

- 1) Find location where the center of the hub will be positioned on the basin.
- 2) Drill or cut the hole in the basin to accept the outside diameter of the hub being installed.
- 3) Place the hub on the basin wall and drill mounting holes in the basin wall to match the hub plate.
- 4) Apply gasket to the back of the plate, mount the plate on the basin.
- 5) Insert bolts, washers and nuts, then tighten in place.

## Standard for Simplex Submersible Panels

A NEMA 1 enclosure, including a main disconnect switch, one set of HRC fuses for short-circuit protection, one magnetic starter, one transformer with primary and secondary fuses (for system other than 120v), 120v control circuit, provision to connect three N.O. floats (FL1: stop float, FL2: pump start, FL3: high water level), one "Hand Off Auto" selector switch, "Power on", "Pump run", "High water level" pilot lights, audible alarm with silencer and test and dry contact for remote alarm.

NEMA Type 1  
General Purpose

To prevent accidental contact with enclosed apparatus. Suitable for application Indoors, where not exposed to unusual service conditions.

NEMA Type 2  
Driptight

To prevent accidental contact with enclosed apparatus. Excludes falling moisture or dirt.

NEMA Type 4  
Watertight

Designed to exclude water applied in form of hose stream. To protect against steam of water during cleaning operations, etc.

NEMA Type 4X  
Corrosion  
Resistant

Designed to exclude water supplied in form of hose stream and used in areas where serious corrosion problem exists.

NEMA Type 12  
Industrial Use

Excludes dust, lint, fibers and flyings or oil or coolant seepage.

## SUBMERSIBLES

# Standard for Simplex Submersible Panels

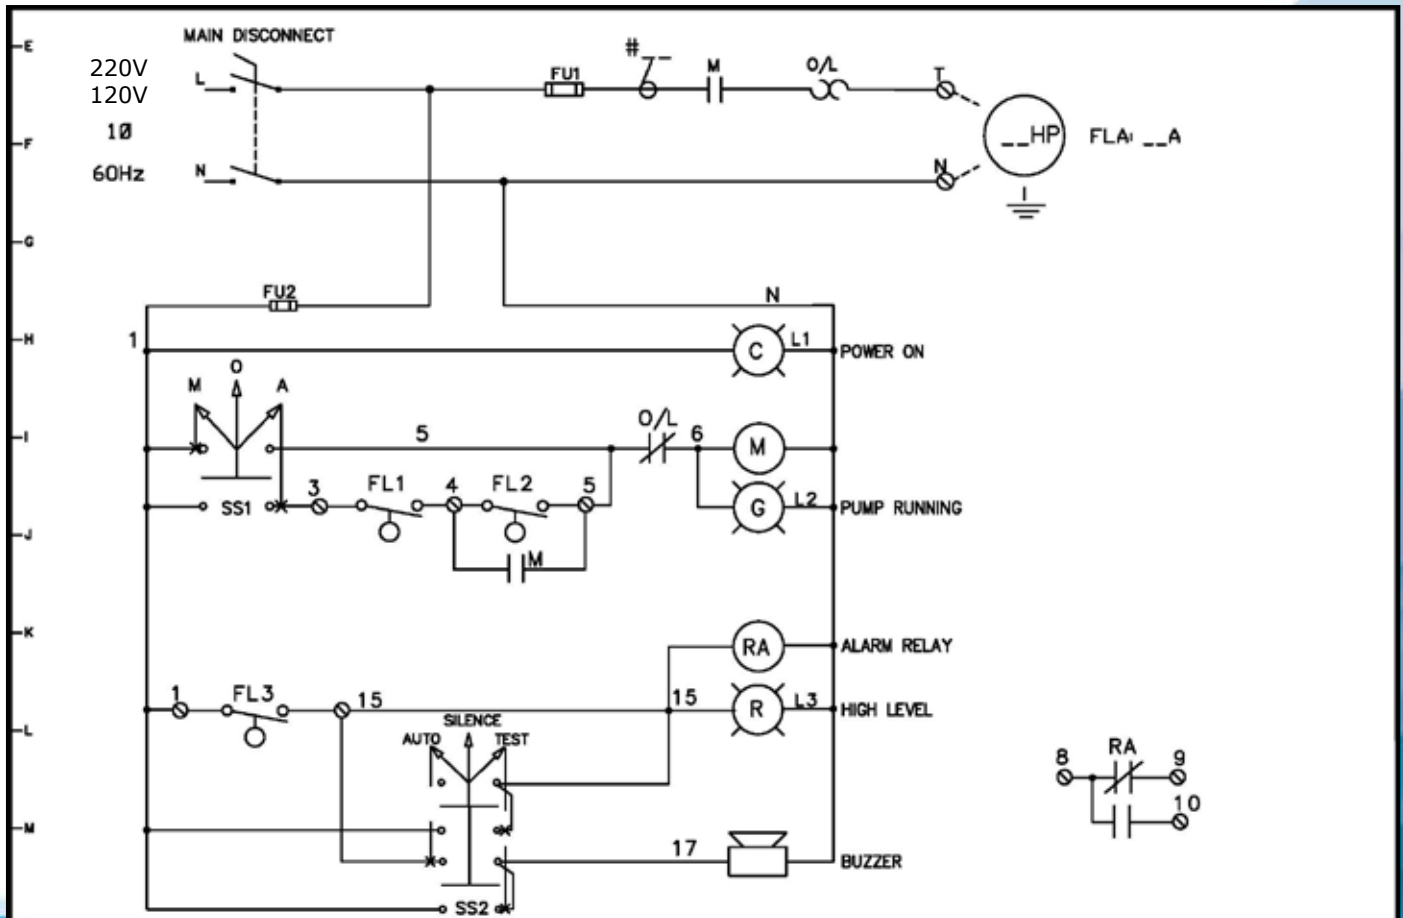

OPT#	DESCRIPTION
1	Enclosure Eemac/Nema 2 – Indoor – Falling water & light splashing
2	Inner door for tamper proofing any enclosure
3	Enclosure Eemac/Nema 12 – Dust tight
4	Enclosure Eemac/Nema 4 – Outdoor – Protection against hose directed water
4A	Enclosure Eemac/Nema 4X – Same as Item 4 but fibreglass corrosion proof
4B	Enclosure Eemac/Nema 4X – Same as item 4 but stainless steel painted corrosion proof (brushed finish available)
5	Alarm relay for remote indication
6	Alarm block (buzzer-silence selector-pilot light)
6A	Alarm block – as above but with silence push button
7	Motor overload (over current) indication per pump (pilot light)
7A	As above but with dry contact for remote indication
8	Seal leak fault per pump (conductivity relay with pilot light)
8A	As above but with dry contact for remote indication
9	Motor overheat fault indication per pump (pilot light)
9A	As above but with dry contact for remote indication
10	Pilot light for various function
11	Alarm bell
12	Elapsed time meter (Nema 1) per pump
13	Intrinsic safe relay (use when floats or electrodes are located in explosive medium)
14	Pump control using conductivity relay and electrodes
15	Loss of phase fault indication (pilot light) on incoming power (use with 3 phase supply)
17	Globe alarm (25 watt-non flashing-shatter proof)
18	Pump protection with breaker on single phase system - Max. 40 Amps - (branch circuit protection device rated – Type E rating)
19	Heater element + thermostat
22	Installation of capacitor pack in panel (for starting single phase pump)
24	Fault indication (Relay + pilot light)
31	Stop/Start with one float
32	Stop/Start with two floats
35	120V Supply for external load (Specify load)
36	Emergency stop push button
38	Low level indication (pilot light)
38A	Low level indication – shutdown with remote indication
39	Low low level indication (pilot light)
39A	Low low level indication – shut down with remote indication
40	Additional stop-start push button per pump
41	Provision for connection of solenoid
43	Remote start/stop signal
43A	24 Volt start signal
44	Lamp test push button
44A	Push to test push button
46	On delay timer (use to avoid nuisance tripping on certain faults)
47	Off delay timer

## SUBMERSIBLES

# Standard for Simplex Submersible Panels

OPT#	DESCRIPTION
48	Two positions selector
55	Indication only of pump failure to start
60	Float failure alarm
63	Ammeter – CT operated – for one pump
64	Voltmeter for system voltage – Direct read
65	Pump stop indication
67	Fault with latching relay and reset button
68	Remote signal for low of power
69	Current detection relay per pump (to confirm pump running)
70	Loss of phase and phase reversal detection and indication (three phase system)
72	Timer for minimum run
73	Timer for maximum run
74	General alarm indication with relay
77	Lightning arrestor
78	Extra for flashing function on pilot light or globe
79	Ground fault indication with pilot light (no stopping of pump)
80	Duplex receptacle – 120 V – 100Watts
81	Motor circuit interrupter (instead of fuses) – Max. 40 Amps – Rated as branch circuit protection device – Type E
81A	Moulded case circuit protector (replaces fuses)
82	Repeat cycle timer
84	Telephone dialler with battery back-up
85	Push button for misc. sequence (describe sequence)
86	Alarm high level
87	Pump start counter
88	Variable freq. drive for variable speed pumps
89	Line or load reactor for above
91	Stop pump on low level in manual mode
93	Horn
95	Auto reset of latched faults on resumption of power
99	Blown fuse indication for single phase system
101A	Circuit breaker protection for primary and secondary of transformer
101B	Circuit breaker protection for secondary of transformer
103	Soft start for reduced voltage starting
105	Forced ventilation (Louvre-Fan-Thermostat)
106	Reversing starter
108	Through the door overload reset buttons
109	Tank alert
112	U/L approval of panel
113	Provision for padlock on enclosure

## Standard for Duplex Submersible Panels

A NEMA 1 enclosure, including a main disconnect switch, two sets of HRC fuses for short-circuit protection, two magnetic starters, one transformer with primary and secondary fuses (for system other than 120v), 120v control circuit, alternating circuit, provision to connect four N.O. floats (FL1: stop float, FL2: lead pump start, FL3: lag pump start, FL4: high water level), automatic transfer to lag pump in case of lead pump overload, two "Hand Off Auto" selectors switches, "Power on", "Pump 1 run", "Pump 2 run", "High water level", pilot lights, audible alarm with silencer and test and dry contact for remote alarm.

NEMA Type 1  
General Purpose

To prevent accidental contact with enclosed apparatus. Suitable for application Indoors, where not exposed to unusual service conditions.

NEMA Type 2  
Driptight

To prevent accidental contact with enclosed apparatus. Excludes falling moisture or dirt.

NEMA Type 4  
Watertight

Designed to exclude water applied in form of hose stream. To protect against steam of water during cleaning operations, etc.

NEMA Type 4X  
Corrosion  
Resistant

Designed to exclude water supplied in form of hose stream and used in areas where serious corrosion problem exists.

NEMA Type 12  
Industrial Use

Excludes dust, lint, fibers and flyings or oil or coolant seepage.

## SUBMERSIBLES

# Standard for Duplex Submersible Panels

OPT#	DESCRIPTION
3	Enclosure Eemac/Nema 12 – Dust tight
4	Enclosure Eemac/Nema 4 – Outdoor – Protection against hose directed water
4A	Enclosure Eemac/Nema 4X – Same as Item 4 but fibreglass corrosion proof
4B	Enclosure Eemac/Nema 4X – Same as item 4 but stainless steel painted corrosion proof (brushed finish available)
5	Alarm relay for remote indication
6	Alarm block (buzzer-silence selector-pilot light)
6A	Alarm block – as above but with silence push button
7	Motor overload (over current) indication per pump (pilot light)
7A	As above but with dry contact for remote indication
8	Seal leak fault per pump (conductivity relay with pilot light)
8A	As above but with dry contact for remote indication
9	Motor overheat fault indication per pump (pilot light)
9A	As above but with dry contact for remote indication
10	Pilot light for various function
11	Alarm bell
12	Elapsed time meter (Nema 1) per pump
13	Intrinsic safe relay (use when floats or electrodes are located in explosive medium)
14	Pump control using conductivity relay and electrodes
15	Loss of phase fault indication (pilot light) on incoming power (use with 3 phase supply)
17	Globe alarm (25 watt-non flashing-shatter proof)
18	Pump protection with breaker on single phase system - Max. 40 Amps - (branch circuit protection device rated – Type E rating)
19	Heater element + thermostat
20	Time clock (use for alternating pumps – Specify 12 hours/24 hours/weekly)
21	Main disconnect
21A	Disconnect for each pump controlled by panel
22	Installation of capacitor pack in panel (for starting single phase pumps)
23	Alternating relay (Electro-Mech)
24	Fault indication (Relay + pilot light)
25	Alternating relay - Electronic
26	Alternator - Mechanical
27	Programmable controller
31	Stop/Start with one float
32	Stop/Start with two floats
35	120V Supply for external load (Specify load)
36	Emergency stop push button
38	Low level indication (pilot light)
38A	Low level indication – shutdown with remote indication
39	Low low level indication (pilot light)
39A	Low low level indication – shut down with remote indication
40	Additional stop-start push button per pump
41	Provision for connection of solenoid
43	Remote start/stop signal
43A	24 Volt start signal
44	Lamp test push button
44A	Push to test push button

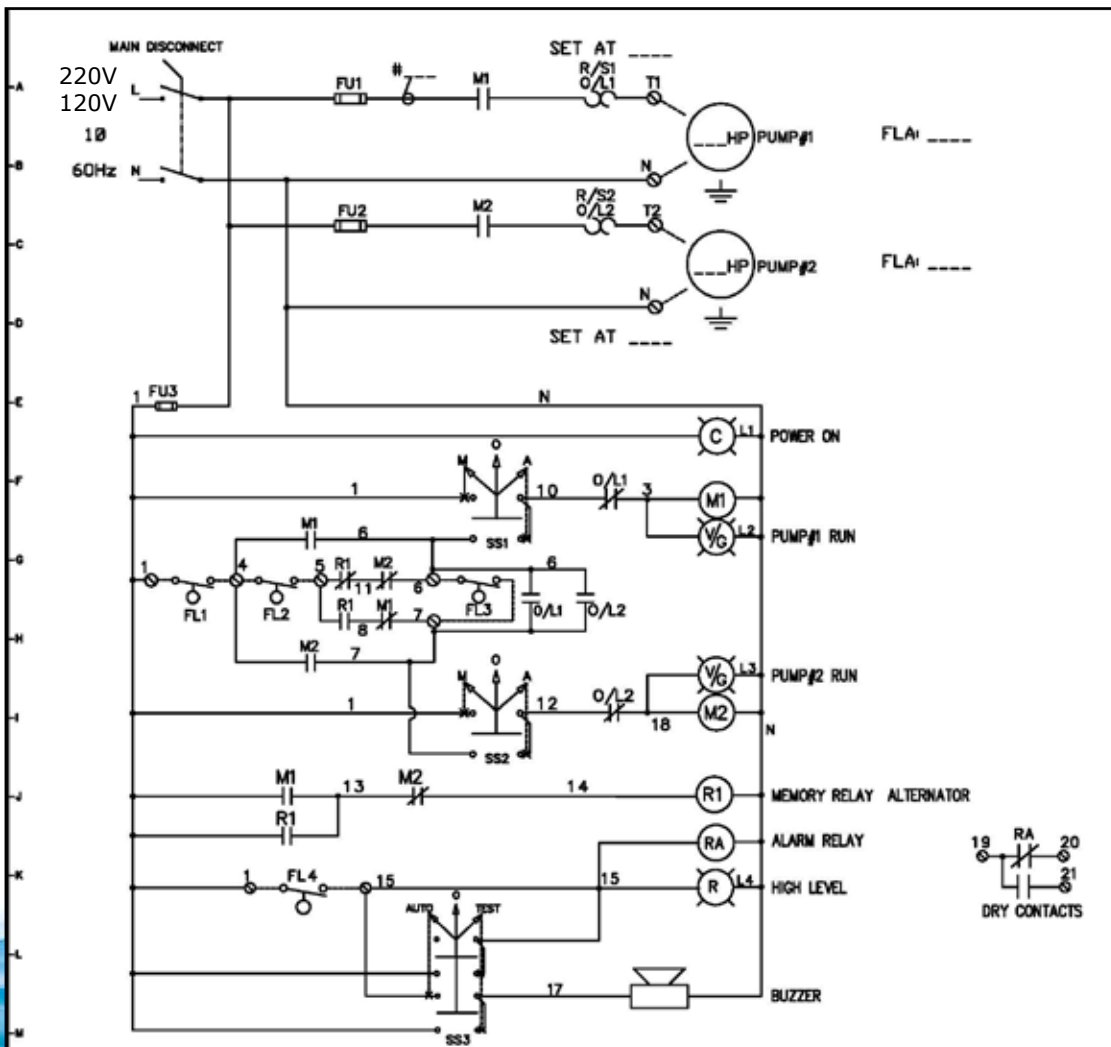

## Standard for Duplex Submersible Panels

OPT#	DESCRIPTION
47	Off delay timer
48	Two positions selector
55	Indication only of pump failure to start
60	Float failure alarm
62	Lead pump selector switch
63	Ammeter – CT operated – for two pumps
64	Voltmeter for system voltage – Direct read
65	Pump stop indication
67	Fault with latching relay and reset button
68	Remote signal for low of power
69	Current detection relay per pump (to confirm pump running)
70	Loss of phase and phase reversal detection and indication (three phase system)
72	Timer for minimum run
73	Timer for maximum run
74	General alarm indication with relay
75	Lag pump demand indication (pilot light)
77	Lightning arrester
78	Extra for flashing function on pilot light or globe
79	Ground fault indication with pilot light (no stopping of pump)
80	Duplex receptacle – 120 V – 100Watts
81	Motor circuit interruptor (instead of fuses) – Max. 40 Amps – Rated as branch circuit protection device – Type E
81A	Moulded case circuit protector (replaces fuses)
82	Repeat cycle timer
84	Telephone dialler with battery back-up
85	Push button for misc. sequence (describe sequence)
86	Alarm high level
86A	Start lag pump on high level
87	Pump start counter
88	Variable freq. drive for variable speed pumps
89	Line or load reactor for above
91	Stop pump on low level in manual mode
93	Horn
95	Auto reset of latched faults on resumption of power
99	Blown fuse indication for single phase system
100	Incoming power from two sources with one control transformer
100A	Incoming power from two sources with two control transformers
101A	Circuit breaker protection for primary and secondary of transformer
101B	Circuit breaker protection for secondary of transformer
103	Soft start for reduced voltage starting
104	Mini-Cas II for seal and temperature fault on Flyght pumps (one per pump)
105	Forced ventilation (Louvre-Fan-Thermostat)
106	Reversing starter
108	Through the door overload reset buttons
109	Tank alert
112	U/L approval of panel
113	Provision for padlock on enclosure
